

Personal Management Services has hired six Mendocino Works clients through the On-the-Job Training program. The OJT program paid half the employee's wages during the contract period, which helped tremendously during the training.
Janis Tappin - Owner

On-the-Job Training (OJT) assists your company with the costs of training new employees by compensating you up to 50% of your trainee's wages for a period up to six months.

Additional Training Costs May be Covered too!

When you hire an employee who is participating in MPIC services, your business benefits in many ways, including:

- ¶ Decreasing your training costs.
- ¶ Hiring an employee who has the ability to learn to do the job - the way YOU want it done.

To maximize your benefits, be sure your contract is signed and in place before you start your new employee.

If your company has a permanent position available, maintains Worker's Compensation benefits and has a federal taxpayer I.D. number, you can take advantage of the OJT program **now**.

All candidates are pre-screened and apply for your position in the manner you choose - YOU do the hiring and select the person that best meets your needs.

MPIC compensates you directly on a monthly basis, in accordance with the hours worked by the trainee.

All at NO COST to you!
